Proof of Work

Social Media Strategy & Execution

Yupp.ai | July 2025 – March 2026
Margaret (lorepunk)

The Brief

Yupp.ai

AI model evaluation platform. Crowdsourced human preference data across 50+ models. Needed a social presence that positioned Yupp as the neutral, data-forward voice in the AI evaluation space.

My Role

Main social media strategist and junior community manager on a two-person marketing team. Zero paid social ad spend. Inherited a neglected community operation. Responsible for brand voice, content strategy, community engagement across X, LinkedIn, Reddit, and Discord. Managed all customer support across four platforms. Built custom Reddit automoderation and social listening agents to scale a one-person operation.

The Numbers

July 2025 – March 2026 | X (Twitter) + LinkedIn | Source: Hootsuite Analytics

4 Platforms

X + LinkedIn + Reddit + Discord

Content, engagement, support, moderation

+10,180

Top Performing Content

Highest-engagement tweets | July 2025 – March 2026

Date	Content	Engagement	Rate	Impressions
Dec 30, 2025	Discord integration launch	**2,456**	6.7%	36.6K
Oct 30, 2025	Halloween community contest	**2,134**	8.5%	25.0K
Feb 11, 2026	GLM 5 model launch (leaderboard thread)	**1,447**	7.8%	18.4K
Jul 7, 2025	Community prompt engagement	**1,400**	5.8%	24.1K
Jan 13, 2026	**Boop — VLM experiment article**	—	—	22.8K*

Boop: Visual Language Model Experiment

*Combined impressions: 7K (article) + 11K (Margaret's tweet) + 4.8K (brand tweet) = 22.8K total. Research-to-content pipeline: original experiment became a top post of 2026.

Peak month: 37,868 messages

617

AI News Readers

Curated channel · sole contributor

AI News Curation

~20 curated AI links every other day. 617 readers in the last 30 days — sole contributor to the channel.

Contest Management

Designed and ran community contests (Halloween, Strawberry Seeds, and more).

Security & Anti-Scam Ops

Frontline scam prevention in a high-churn crypto community. Worked with Drew Security (Boring Security) on automated moderation.

Support & Moderation

Frontline customer support. Co-managed moderators. Handled escalations, tickets, and day-to-day community health.

Engagement Strategy

Yupp is a mirror, not a voice. Show data, don't have opinions.

Data Drop

Fast replies on model launches with leaderboard data. First to respond with preference scores.

Pattern Flag

Pointing at gaps between benchmarks and human preference. Surface insights others miss.

Measurement Q

Engaging evaluation methodology questions from researchers and practitioners.

Strategic Amplify

Confirming credible voices with preference data. Build authority by backing smart takes.

The System I Built

AI-augmented social listening to scale a one-person operation

Raccoon MCP Server

19-tool AI server: Twitter scanning, Reddit monitoring, research, analytics, Typefully publishing

Lorevna (Slack Bot)

AI assistant in Slack. Natural language interface to all tools. Boot context + regression learning.

Reddit Integration

4 tools for scanning subreddits (LocalLLaMA, ClaudeAI, singularity). Opportunity scoring.

Reply-Mode Scoring

AI classifies tweets into 4 modes. Scores relevance. Surfaces the highest-value engagement opportunities.

By the Numbers

19 MCP Tools Built

191 Operational Log Entries

19 Learned Regressions

38 Automated Scans

14 Typefully Threads

Community Intelligence

Not just posting content. Embedded in the communities that matter.

TPOT / AI Twitter

Active participant in "This Part of Twitter" — the AI research and engineering community. Direct relationships with researchers, builders, and evaluators.

On Scoble's AI Lists

Personally curated onto Robert Scoble's AI lists (List 7). Recognized as a voice in AI, not just an observer. Lists also used as signal source for the social listening system.

Crypto Twitter Inner Circle

Established network in crypto/web3 Twitter. Cross-pollination between AI and crypto communities for Yupp's token-incentivized model.

Lab & Research Connections

Relationships with people at AI labs and research institutions. Enables early signal on model releases and evaluation methodology discussions.

This network is not transferable. It was built through months of genuine participation, not follower campaigns.

Operational Learning System

Every failure becomes a guardrail. The system gets smarter over time.

Constitutional

Permanent rules.
Never auto-post.
Always verify tweet IDs.
Resolve RT metrics.

Trust: 1.0 (never decays)

Strategic

90-day half-life.
Client preferences.
Brand voice rules.
Reply-guy strategy.

Trust: decays over 90 days

Operational

30-day half-life.
Scan results.
Session context.
Draft feedback.

Trust: decays over 30 days

Failure → Regression logged → Guardrail activated → Boot context updated → Next session loads learnings

What I Shipped

Jul–Sep 2025

Foundation

Brand voice development. Content strategy. Daily posting rhythm. Scoble list access.

Oct 2025

Breakout Month

+1,898 followers (+9.2%). Model launch coverage strategy. Speed Control & Style Control positioning.

Nov–Dec 2025

Scale

AI-augmented tooling (Raccoon MCP). Typefully integration. 434K impressions (Dec). Leaderboard thread series.

Jan 2026

System

Lorevna Slack bot. Automated scanning. Reply-mode scoring. Operational learning loop. +1,767 followers.

Feb–Mar 2026

Full Stack

Reddit integration (4 tools). PPBench showcase. Research collaboration. 19-tool MCP server.
